# **SPEAKER, AUTHOR AND PROGRAM PLANNER DISCLOSURES**

The American College of Medical Genetics and Genomics has implemented a process where everyone who is in a position to influence and/or control the content of a continuing education activity must disclose all relevant financial relationships with any commercial interest and any conflicts must be resolved prior to the activity. Participants of educational programs must be informed of an organizer's and or a presenter's academic and professional affiliations and existence of any relevant financial relationship a presenter has with any proprietary entity producing health care goods or services consumed by, or used on patients, with the exemption of non-profit or government organization and non-health care related companies. The intent of this disclosure is not to prevent a speaker from making a presentation. This policy allows the listener/attendee to be fully knowledgeable in evaluating the information being presented.

Disclosure includes any relationship that may potentially bias the planning of the continuing education activity or may potentially bias one's presentation or which, if known, could give the perception of bias. These situations may include but are not limited to:

1. Stock options or bond holdings in a for-profit corporation or self-directed pension plan
2. Research and/or educational grants
3. Employment (full- or part-time)
4. Ownership or partnership
5. Consulting fees, royalties or other remuneration
6. Non-remunerative positions of influence such as officer, board member, trustee, or public spokesperson
7. Receipt of royalties
8. Speakers' bureau
9. Other

Members of the ACMG Staff, Education and Program Committee involved in planning the ACMG Annual Clinical Genetics Meeting are required to indicate relationships which could be perceived by some as a real or apparent conflict of interest in planning the invited concurrent sessions. In these cases, the committee members refrained from the discussion. All disclosures have been reviewed by the Program and Education Committees and conflicts of interest disclosed.

Following is an alphabetical list of invited session speakers and authors of abstracts who have disclosed one or more such relationships and names of companies with which those relationships exist:

ACMG program and education committee members provide full disclosure forms disclosing all financial interests prior to being approved for an ACMG committee or staff position and are required to update these forms annually. Individuals who disclosed conflicts on their participation agreements are listed below (however disclosures were called at the start of each meeting to determine if the individual would provide potential bias in the programming of the ACMG Annual Clinical Genetics Meeting).

Stock options or bond holdings in a for-profit corporation or self-directed pension plan  
 Research and/or educational grants  
 Employment (full- or part-time)  
 Ownership or partnership  
 Consulting fees, royalties or other remuneration

Non-remunerative positions of influence such as officer, board member, trustee, or public spokesperson  
 Receipt of royalties
